

## MANGO PROCESSING MACHINE

Machine for peeling, cutting and stoning mangoes without human intervention.

### BACKGROUND

Actually the use of mango processing machines is well known in the food industries, however existing machines in the market only do each step of the process apart, this means that one machine only peels the fruit, other machine only cuts and another machine is required for the stoning operation, resulting in an unpractical process.

### KEY BENEFITS

- Automatic machine that can do the 3 operations.
- No need of human intervention.
- The machine can be adjusted to process other type of fruits.
- Easy maintenance of the machine.
- Simple and functional.
- Saving of operation costs.
- Higher production and productivity.

### TECHNOLOGY

A machine for processing mangoes in an automatic manner such that the peeling, cutting and stoning operations are carried out without the need for human intervention.

### DEVELOPMENT STATUS

TECHNOLOGY READINESS LEVEL: 3/9

### INTELLECTUAL PROPERTY

Patent Number: WO2015041511 A1 ;  
PCT/MX2013/000107

This technology is available for licensing. More opportunities on our website: <http://redottec.com>
